

KRUNAL PANCHAL

Senior Android Developer & Mobile Solutions Architect

Gujarat, India | LinkedIn: [linkedin.com/in/krunalmobile](https://www.linkedin.com/in/krunalmobile) | GitHub: github.com/krunal-labs | Portfolio: krunal-labs.github.io

PROFESSIONAL SUMMARY

Senior Android Developer and Mobile Solutions Architect with 11+ years architecting and shipping scalable Android, iOS, and cross-platform applications across 5+ countries. Proven record directing end-to-end product lifecycles, having launched 250+ applications from MVP design through production deployment, maintaining >99.9% crash-free session rates across multi-million user bases. Driven by a pragmatic engineering philosophy: building clean, maintainable architecture (MVI, MVVM, Clean Architecture) that eliminates unnecessary complexity while ensuring long-term maintainability. Experienced technical lead adept at translating business requirements into architectural documentation, technical roadmaps, and accurate sprint estimations. Full-stack proficient with Python, Node/JS, and REST/GraphQL APIs, enabling robust API contract design, CI/CD build automation, and engineering leadership across distributed teams.

TECHNICAL SKILLS

- **Languages & Platforms:** Android SDK, iOS, Kotlin, Java, Swift, Dart, Python, JavaScript/TypeScript
- **Cross-Platform & SDKs:** Kotlin Multiplatform (KMM), Flutter, React Native, Mobile SDK Architecture & Publishing
- **Architecture & Patterns:** Clean Architecture, MVI, MVVM, Repository Pattern, BLoC, Offline-First, State Management, Dependency Injection (Hilt, Dagger, Koin)
- **Android/iOS Toolkit:** Jetpack Compose UI, SwiftUI, Kotlin Coroutines, Flow, RxJava, Room Database, SQLite, Android Studio, Xcode, Fastlane, Jenkins, CI/CD, Git
- **Connectivity & Hardware:** Bluetooth/BLE, GATT Profiles, USB, UART, MODBUS, WebSocket, MQTT, WebRTC, RESTful APIs, GraphQL
- **Maps, Location & AR:** Mapbox Routing, Google Maps, Here Maps, Indoor Navigation, Geofencing, ARCore (Augmented Reality), 360° Immersive Media, Wearables
- **Backend & Cloud:** Firebase (Auth, Realtime DB, Firestore, Crashlytics, Analytics), Push Notifications (FCM), Payment Gateways (Stripe, PayPal, Razorpay), In-App Billing
- **Quality & Profiling:** Unit Testing (JUnit, Mockito), Espresso UI Tests, Memory Profiling (LeakCanary), ANR Bottleneck Resolution, Sentry Telemetry, Performance Optimization

WORK EXPERIENCE

Mapsted Inc. — Canada (Remote)

Jul 2024 – Apr 2026

Senior Android Developer — Maps SDK, Android, Kotlin Multiplatform (KMM), iOS

- Maintained a **99.9% crash-free session rate across 10M+ user sessions** by profiling memory allocations, resolving critical memory leaks via LeakCanary, and eliminating Application Not Responding (ANR) bottlenecks.
- Architected modular SDK components across **25+ modules** for scalable third-party enterprise integrations, including building 1 greenfield **Kotlin Multiplatform (KMM)** indoor navigation SDK from scratch.
- Optimized vector map rendering performance by **55%** and reduced memory footprint for dense indoor venue datasets by **60%**.
- Implemented a request-collapsing pattern improving concurrent request efficiency by **80%**, and refined multi-tier cache hierarchies cutting redundant network calls by **60%**.
- Built automated Python CI/CD scripts for continuous integration, automated artifact packaging, semantic versioning, and distribution verification.
- Authored technical architecture documentation, led sprint estimations, enforced code review standards, and mentored 4 developers in a 100+ distributed engineering team.

Techtic Solutions Pvt. Ltd. — India (Remote)

Dec 2021 – Apr 2024

Senior Android Developer — Android, iOS, Flutter, React Native

- Led mobile architecture and end-to-end delivery for **10+ production applications** across US and EU markets, sustaining >99.8% crash-free rates across 50,000+ active users.
- Refactored legacy codebases into modular Clean Architecture (MVI/MVVM/BLoC), reducing regression defects by 30% and accelerating feature delivery cycles by 35%.
- Achieved **80%+ unit test coverage** on core business logic using JUnit and Mockito, integrating automated Espresso UI testing suites.
- Configured telemetry pipelines using Firebase Remote Config, Crashlytics, and custom event schemas for structured A/B testing to guide product iterations.
- Served as primary technical lead and client liaison, translating product specifications into clear engineering roadmaps while mentoring 3+ engineers.
- **Utility NYC, USA:** Directed native Android engineering delivering *Mount Sinai Parenting Centre*, *MindFitness*, and *GIA Diamonds* with zero-defect releases.
- **Kompaio, Belgium:** Architected offline-first navigation app from scratch (10k+ users), dynamic CMS guide engines, Mapbox routing, and ARCore 360° media rendering across 30+ releases.

Sapratigs LLP — India (Remote) <i>Senior Android Developer — Android, iOS, Flutter, Hardware & BLE</i> - Engineered hardware-connected Android applications interfacing with external BLE/GATT devices, managing concurrent real-time data sync across 25+ peripheral sensors. - Architected fault-tolerant background services, connection-retry state machines, and local Room/SQLite persistence pipelines for automated daily diagnostic reporting. - Optimized location tracking algorithms for ultra-low battery consumption and uninterrupted, long-running hardware deployments.	Jan 2020 – Sep 2021
Novus Logics — India (Remote) <i>Senior Android Developer — Android, iOS, React Native, Flutter</i> - Delivered 5+ production Android applications across e-commerce, POS, and social networking (50,000+ users) utilizing modular MVVM architectures in Java and Kotlin. - Integrated RESTful and GraphQL endpoints with optimized caching layers, reducing network payload latency by 25%.	Sep 2018 – Jan 2020
Squirrel Softech Pvt. Ltd. — Android Developer Published 15+ native Android apps (2k–10k+ DAU) from concept to deployment, refactoring legacy components to modern Android Jetpack standards while mentoring 5 junior developers.	Nov 2016 – Sep 2018
Merchant IT Lab — Android Developer Engineered native Android applications in Java, participating in full development lifecycles, Git workflows, and code review standards.	Jul 2014 – Oct 2016

NOTABLE PRODUCTION PROJECTS

Joom: Global e-commerce app (100M+ Downloads, 4.5★) with high-concurrency feeds, modular architecture, and localized payments. Tiqets: Worldwide ticketing platform (1M+ Downloads, 4.7★) with interactive venue maps, offline passes, and integrated gateways. Map Marker: Spatial location management app (1M+ Downloads, 4.6★) with custom GPS tracking, polygon clustering, and offline GIS. Beyond Budget: Offline-first personal finance tracker (100k+ Downloads, 4.6★) with reactive Room caching and budgeting charts. Mapsted Locate & Sandbox: Enterprise indoor positioning and IoT asset tracking client applications built on proprietary indoor positioning SDKs. CampusGo & Sheridan CampusWay: Precision campus navigation and wayfinding deployments for University of Windsor and Sheridan College.	LightInTheBox: International retail app (10M+ Downloads) featuring dynamic product catalogs, multi-currency checkout, and deep-link routing. Home Centre & Splash Fashions: Landmark Group flagship apps (1M+ Downloads each) with omnichannel search and loyalty SDK. Flowtime: Real-time biosensing app integrated with EEG headband hardware over low-latency Bluetooth BLE/GATT protocols. Kompaio: Interactive city tour app featuring Mapbox routing, dynamic CMS updates, and ARCore 360° historical views across Europe. Sinar MLog: Industrial BLE data collection application executing concurrent real-time sync across 15+ agricultural hardware sensors. Mount Sinai Daily: Healthcare employee communications app keeping hospital personnel informed and connected (SocialChorus/Firstup).
